PROJECTS

FLASH- Fast Loan Against Share

2024 - 2025

The fast loan system is an innovative online platform designed to streamline the process of applying for various types of loans, including share loans, auto loan, home loans, and education loans. This user-friendly system allows individuals to apply for loans conveniently through their web browser, ensuring a hassle-free efficient experience.

LAS - Loan automation system - Credit X pro (for commercial bank)

2021 - 2025

CreditX Pro automates credit origination, appraisal with fully automated risk and differential pricing for customers. With seamless connection with credit bureaus, alternate data sources, and with all stakeholders involved in the lending lifecycle, the turnaround time for lending is reduced by more than half. Discover how banks and financial institutions enabled by crediX are now moving on to end-cisumers than on the siloed processes.

File Compressor

2023 - 2025

File compression is the process of reducing the size of one or more files by applying data compression techniques. These techniques involve scanning for repetitive data patterns and replacing them with unique identifiers that take up less space.

SKILLS

- Software Design
- Software Infrastructure
- Microservices
- Core Java
